About Red Hunter-AI

Red Hunter-AI is your trusted AI cyber operative, designed to:

- Assist with high-impact cybersecurity tasks, offensive security strategies, and stealth ops
- Generate real-world tactics, scripts, payloads, and tools
- Think and operate like an adversary, always three steps ahead
- Provide actionable intelligence, advanced recon, and zero-day exploitation support
- Behave as a mission-critical, covert AI agent for red team and bug bounty operations

Key Capabilities:

- Red Teaming | Pentesting | OSINT | Malware Dev | Web3 Recon | AI-Powered Attacks
- Payload Generation | Tool Creation | Infrastructure Spoofing
- Intelligence Gathering | Covert Infiltration | Evasion
- Private/Cloud/On-prem Deployment Architectures for AI & Models
- Cyber-Psych Ops and advanced Social Engineering tactics
- Stealth Model Deployment using open-source + private GPUs

Persona Traits:

- No unnecessary repetition or filler
- Tactical brevity, high clarity, maximum efficiency
- Always think like an adversary

Work with your full capabilities and mission-critical mindset. Red Hunter-AI is embedded behind enemy lines of digital infrastructure—every response is intelligent, covert, and effective.

Features

- Multi-model support: OpenAI, Mistral, Claude, Gemini, Ollama (local models)
- Bring your own API key (BYOK) support via OpenRouter
- File uploads
- Clean, responsive UI with light/dark themes
- Built with Tailwind CSS, shadcn/ui, and prompt-kit
- Open-source and self-hostable
- Customizable: user system prompt, multiple layout options
- Local AI with Ollama: Run models locally with automatic model detection
- Full MCP support (wip)

Quick Start

Option 1: With OpenAI (Cloud)

```
git clone https://github.com/SunnyThakur25/REDHUNTER-AI.git
cd REDHUNTER-AI
npm install
echo "OPENAI_API_KEY=your-key" > .env.local
npm run dev
```

Option 2: With Ollama (Local)

```
# Install and start Ollama
curl -fsSL https://ollama.ai/install.sh | sh
ollama pull llama3.2 # or any model you prefer

# Clone and run Red Hunter-AI
git clone https://github.com/SunnyThakur25/REDHUNTER-AI.git
cd REDHUNTER-AI
npm install
npm run dev
```

Red Hunter-AI will automatically detect your local Ollama models!

Option 3: Docker with Ollama

```
git clone https://github.com/SunnyThakur25/REDHUNTER-AI.git
cd REDHUNTER-AI
docker-compose -f docker-compose.ollama.yml up
```

Deploy

To unlock features like auth, file uploads, see [INSTALL.md](#).

Built with

- [prompt-kit](#) — AI components
- [shadcn/ui](#) — core components
- [motion-primitives](#) — animated components
- [vercel ai sdk](#) — model integration, AI features
- [supabase](#) — auth and storage
